Arslan Yersain	Tuesday 11:00-13:00 Saturday 12:00-18:00	-	Telegram @arslanyersain	a.yersain@kbtu.kz

COURSE DURATION: 3 credits, 15 weeks, 45 class hours

COURSE DESCRIPTION

This course is designed to equip learners with a thorough understanding of Django, the powerful and versatile Python web framework. Over 15 comprehensive lectures, students will journey from the foundational aspects of Django to its best practices. The course is structured to provide not only theoretical knowledge but also practical skills, culminating in a hands-on project that encapsulates the entire curriculum.

COURSE OBJECTIVES

The main objective of the course is to provide students with a understanding and practical proficiency in Django. By the end of the course, students will be able to

1. Understand Web Development Architecture
2. Build Websites using Django Framework and Django REST Framework
3. Master Django and Database Management (Django ORM)
4. Develop RESTful APIs with Django REST Framework
5. Deploy Django Applications
6. Prepare for Advanced Django Topics

COURSE OUTCOMES

Knowledge and skill levels obtained during the study of this course must correspond to the knowledge and skill of bachelor given in qualification description.

COURSE POST REQUISITES

Web application using Django and Django REST Framework

LITERATURE

Docs

1. Python Docs <https://docs.python.org/3/>
2. Django Docs <https://docs.djangoproject.com/en/5.0/>
3. DRF Docs <https://www.django-rest-framework.org/>

Books

1. **Fluent Python**
2. **Designing Data-Intensive Application**
3. **Django** <https://djangobook.com/>

COURSE ASSESSMENT CRITERIA

Assessment occurs continuously throughout the course. The evaluation will be based on the levels of (maximums in %):

Type of activity	Final scores
Attendance /participation	10%
Quiz and homework	10%
Midterm Project	30%
Final exam* Project defense	50%
Total	100%

COURSE CALENDAR

Week	CLASS WORK		Practice	Homework
	Topic	Lec-tures		
1	2	3	4	5
1	Lecture #1. Introduction to Web Development <ol style="list-style-type: none">1. Overview of Web2. Web architecture (Server – Client)3. Web protocols4. HTTP Status codes, Content-Type5. System Design Basics6. Comparing Python Frameworks	3	Practice #1	Homework #1
1	2	3	4	5

2	Lecture #2. Introduction to Django <ol style="list-style-type: none"> 1. Overview of Django 2. Django's architecture and design philosophy 3. Setting up a development environment 4. URL configuration and patterns 5. Writing views to process data and return responses 6. Mapping URLs to views 7. Create a simple Django Project 	3	Practice #2	Homework #2
3	Lecture #3. Django Templates <ol style="list-style-type: none"> 1. Template system in Django 2. Jinja 3. Using templates to generate dynamic HTML content 		Practice #3	Homework #3
4	Lecture #4. Django Forms and User Input <ol style="list-style-type: none"> 1. Working with Django Forms 2. Validating and processing user input 3. Customizing form appearance and behavior 4. Implementing CRUD Operations 5. Integration forms with CRUD functional 6. Connecting Templates with Forms 	3	Practice #4	Homework #4
5	Lecture #5. Django Models and Databases <ol style="list-style-type: none"> 1. Understanding models in Django 2. Database setup and migrations 3. Defining models and understanding ORM 4. Admin interface basics 	3	Practice #5	Homework #5
6	Lecture #6. Advanced Models and Relationships <ol style="list-style-type: none"> 1. Advanced models features 2. Relationships 3. Using model managers 4. MTV 5. Class-Based Views 	3	Practice #6	Homework #6
7	Lecture #7. User Authentication and Authorization <ol style="list-style-type: none"> 1. User authentication system in Django 2. Managing users and permissions 3. Creating superusers & users 	3	Practice #7	
8	MIDTERM	3		

9	Lecture #8. Django REST Framework 1. Introduction to RESTful APIs with Django 2. Serializers 3. ViewSets		Practice #8	Homework #8
10	Lecture #9. Django Rest Framework Advanced 1. DRF best practices 2. Integration with third-party apps 3. Customizing serializer and view logic	3	Practice #9	Homework #9
11	Lecture #10. Docker Basics 1. Introduction to Docker 2. Understanding containerization and its advantages 3. Overview of Docker	3	Practice #10	Homework #10
12	Lecture #11-#12. Advanced Django & Django Rest Framework 1. Documentation 2. Authentication methods 3. Analyzing real-world use cases of Django with DRF 4. Discussing deployment strategies 5. Applying best practices and advanced features	3	Practice #11	Homework #11
13	Lecture #11-#12. Advanced Django & Django Rest Framework	3	Practice #12	Homework #12
14	Open Questions	3		
15	ENDTERM	3		
16-17	Final Project		COURSE PROJECT DEFENCE	

ATTENTION!

- 1) If student missed without plausible reason more than **30% of lessons student receives «F (Fail)» grade;**
- 2) If for two attestations student receives 29 or less points, this student is not accepted to final exam and for all course he (she) receives **«F (Fail)» grade;**
- 3) If student receives on final exam 19 or less points, then independently on how many points he (she) received for two attestations, in whole he (she) receives **«F (Fail)» grade;**
In the case of missing or being late for final exam without plausible reason, independently on how many points he (she) received for two attestations, in whole he (she) receives **«F (Fail)» grade.**
- 4) It is forbidden to change the topic of the course project and change the composition of the team after 2 weeks of training.
- 5) If a student obtains **30 points** in theoretical knowledge, but does not have a **finished course project (15 week)**, he is not allowed to defend the project and receives an **«F (Fail)» grade** for the course automatically.
- 6) If a student missed more **than 50%** of the lectures due to health problems and has medical documents in the form of KBTU, but did not complete the course project, the student is not allowed to **defend the course project**, and it is recommended to take an **academic leave.**

7) In case of non-compliance of the course project with the **given assignment**, the student is not allowed to **defend the course** project and automatically receives an «**F (Fail)**» grade.

8) In case of detection **of plagiarism** in the course project, the student is automatically not allowed to defend the course project and receives «**F (Fail)**» grade.

Academic Policy:

- Cheating, duplication, falsification of data, plagiarism are not permitted under any circumstances!
- Students must participate fully in every class. While attendance is crucial, merely being in class does not constitute “participation”. Participation means reading the assigned materials, coming to class prepared to ask questions and engage in discussion.
- Students are expected to take an active role in learning (the instructor will provide the information and guidelines to do this).
- Students must come to class on time.
- Students are to take responsibility for making up any work missed.
- Make up tests in case of absence will not normally be allowed.
- Mobile phones must always be switched off in class.
- Students should always show tolerance, consideration and mutual support towards other students.

Students are encouraged to

- consult the teacher on any issues related to the course;
- make up within a week’s time for the works undone for a valid reason without any grade deductions;
- make any proposals on improvement of the academic process;
- track down their continuous rating throughout the semester.
